

Lewers Logic LLC

Brand Guide

Version: 2.0

Last Updated: March 2026

Status: Active

1. Brand Identity Overview

Lewers Logic LLC is a technology-forward, business-focused brand that balances engineering precision with corporate trust. The brand serves enterprise and professional audiences who value innovation, reliability, and premium quality.

Core Brand Pillars

- Engineering Excellence: Precision, logic, and technical sophistication
- Premium Business: Trust, professionalism, established authority

- Accessible Innovation: Technology made usable and clear

2. Logo and Visual Identity

Logo Description

- L Letterform: Primary teal accent (#25A09C) on the L
- Logic Wordmark: Deep Logic Blue (#081634)
- Proportions: Golden ratio alignment, geometric precision
- Usage: Always includes accompanying wordmark in primary applications

Logo Variations

- Primary (Full Color): Teal L + Deep Blue text (preferred)
- Monochrome (Dark): All Deep Logic Blue (#081634)
- Monochrome (Light): All Soft Gray (#E9F0EF)
- Reverse: On dark backgrounds, use all white or Soft Gray

Clear Space

Minimum clear space around logo: 0.5x the height of the L

Do's and Don'ts

Do:

- Use primary full-color version on light backgrounds
- Scale proportionally (maintain aspect ratio)
- Apply monochrome versions for single-color contexts
- Use reverse/light on Dark backgrounds

Don't:

- Stretch, compress, or distort the mark
- Change the teal L to gold (teal is reserved for the logo accent)
- Rotate or skew the letterform
- Add drop shadows, gradients, or effects not in the original
- Use on backgrounds with insufficient contrast

3. Color Palette

Primary Color System

Color	Hex	RGB	Usage	Notes
Deep Logic Blue	#081634	8, 22, 52	Primary dark, headings, navigation text, body copy	Main brand color; used for structure and authority
Near Black	#12131A	18, 19, 26	Deepest applications, maximum contrast	Use sparingly; creates emphasis
Navy Light	#0D2B49	13, 43, 73	Secondary dark, hover states on blue	Transition between blue and deeper states

Accent Colors (Equal Secondary)

Color	Hex	RGB	Role	Usage
Engineered Teal	#25A09C	37, 160, 156	Primary Accent — Technology	Links, CTAs, form focus, interactive elements, product highlights, logo L

Premium Gold Accent	#C4962C	196, 150, 44	Secondary Accent — Business	Business context, trust signals, premium labels, pricing, awards, section dividers on formal docs
---------------------	---------	--------------	-----------------------------	---

Accent Tonal Variations

Teal Family:

- Teal Light (#9DD2D0): Hover/highlight states, light backgrounds, legibility on dark
- Teal Dark (#318C88): Pressed/active states, deeper emphasis
- Teal Range: Provides depth and interaction feedback

Gold Family:

- Gold Light (#E0C97A): Hover/highlight states, legibility on dark backgrounds
- Gold Dark (#A67A1E): Pressed/active states, deeper emphasis
- Gold Range: Premium warmth without overwhelming

Neutral Colors

Color	Hex	RGB	Usage
Soft Gray	#E9F0EF	233, 240, 240	Light backgrounds, cards, subtle containers
Gray Dark	#727578	114, 117,	Captions, metadata,

		120	disabled text, secondary content
--	--	-----	----------------------------------

Color Combinations (Do's and Don'ts)

Approved Combinations:

- Teal on Deep Blue or white
- Gold on white or light gray backgrounds
- Teal text on white (links, CTAs)
- Gold text on white (premium labels, badges)
- Teal Light on Deep Blue (interactive hover on dark backgrounds)
- Gold Light on Deep Blue (premium hover on dark backgrounds)

Forbidden Combinations:

- Teal text on gold background (insufficient contrast, visual clash)
- Gold text on teal background (insufficient contrast, visual clash)
- Teal + Gold in the same element (confusing, violates accent roles)
- Near Black text on Deep Blue (insufficient contrast)

Color Accessibility

- Contrast Ratios: All text meets WCAG AA (4.5:1 minimum)
- Dark Mode: Use Teal Light (#9DD2D0) and Gold Light (#E0C97A) on dark backgrounds

- Color Blindness: Avoid relying solely on teal/gold distinction; always pair with icons, labels, or patterns

4. Typography

Font Stack

Primary Font: Inter

- Typographic Purpose: Body, UI, navigation, general text
- Source: Google Fonts (Variable font preferred)
- Weights Used: 400 (Regular), 500 (Medium), 600 (Semibold), 700 (Bold)
- Characteristics: Modern, geometric, highly legible, technical-friendly

Code/Monospace Font: JetBrains Mono

- Typographic Purpose: Code blocks, technical content, terminal output
- Source: Google Fonts
- Weights Used: 400 (Regular), 600 (Semibold)
- Characteristics: Clear character distinction, technical credibility

Type Scale

Usage	Size	Weight	Line Height	Letter Spacing
H1 Heading	48px	700	1.2	-0.5px
H2 Heading	36px	700	1.3	-0.3px
H3 Heading	28px	600	1.35	0px

H4 Heading	22px	600	1.4	0px
Body Large	18px	400	1.6	0px
Body Regular	16px	400	1.6	0px
Body Small	14px	400	1.5	0px
Caption	12px	400	1.4	0.5px
Code Block	14px	400	1.6	0px (mono)

Typography Usage

Headings (H1-H4):

- Color: Deep Logic Blue (#081634)
- Font-weight: 600–700
- Line-height: 1.2–1.4 (tighter for visual hierarchy)
- Letter-spacing: Negative or 0 (tighter tracking)
- Margin-bottom: 1rem (below heading)

Body Text:

- Color: Deep Logic Blue (#081634) or Navy Light (#0D2B49)
- Font-weight: 400
- Line-height: 1.6 (generous for readability)
- Font-size: 16px (primary), adjust as needed
- Max-width: 75 characters (optimal reading line)

Captions & Metadata:

- Color: Gray Dark (#727578)
- Font-weight: 400
- Font-size: 12–14px

- Text-transform: Occasionally uppercase for labels (with +0.5px tracking)

Code/Monospace:

- Font-family: JetBrains Mono, monospace
- Font-size: 14px
- Color: Near Black (#12131A) or Deep Logic Blue
- Background: Soft Gray (#E9F0EF)
- Padding: 2px 6px (inline), 16px (blocks)

Links:

- Color: Engineered Teal (#25A09C)
- Text-decoration: Underline (standard)
- Hover: Teal Dark (#318C88), maintain underline
- Active/Visited: Teal Dark (#318C88)

5. Accent Usage Rules (Critical)

Teal (#25A09C) — Technology, Product, Interactive

Use teal for:

- Product UI and interactive elements
- Links and hypertext
- CTA buttons (primary action — Submit, Save, Continue)
- Form focus rings and active states
- Icon accents in technology contexts
- Navigation highlights and active tabs
- Progress indicators and status signals
- Logo L (immutable)

Rationale: Teal conveys technology, innovation, and user action. It draws attention to interactive elements.

Example contexts: Software features, technical documentation, form interactions, product demos.

Gold (#C4962C) — Business, Trust, Premium

Use gold for:

- Business context and corporate branding
- Trust signals and certifications (badges, seals)
- Premium labels (Premium, Exclusive, Enterprise)
- Pricing highlights and premium tiers
- Section dividers on formal/corporate documents
- Awards and achievement badges
- Learn More or secondary call-to-action buttons
- Premium pricing labels and tier indicators
- Official certificates and credentials

Rationale: Gold conveys value, prestige, and business authority. It signals premium quality and trust.

Example contexts: Enterprise pricing pages, corporate documents, award announcements, business certifications.

Button Usage (Both Accents)

Primary Buttons (Teal):

- Action verbs: Submit, Save, Continue, Send, Create, Update
- Technology-focused actions
- Primary call-to-action on product pages
- Form submission buttons
- Default state: Engineered Teal (#25A09C)
- Hover: Teal Dark (#318C88)

- Active/Pressed: Teal Dark (#318C88) + slight inset effect

Secondary Buttons (Gold):

- Learn More, Explore, Discover (informational CTAs)
- Premium or upsell actions
- Business/corporate contexts
- Alternative actions on pricing pages
- Default state: Premium Gold Accent (#C4962C)
- Hover: Gold Light (#E0C97A)
- Active/Pressed: Gold Dark (#A67A1E) + slight inset effect

Interactive States

State	Teal	Gold
Default	#25A09C	#C4962C
Hover	#318C88	#E0C97A
Active/ Pressed	#318C88 (darker bg)	#A67A1E
Disabled	Gray Dark (#727578)	Gray Dark (#727578)
Focus Ring	Teal Light (#9DD2D0) on dark bg	Gold Light (#E0C97A) on dark bg

Dark Background Usage

- Teal: Use Teal Light (#9DD2D0) for legibility
- Gold: Use Gold Light (#E0C97A) for legibility
- Contrast: Both meet WCAG AA standards on Dark backgrounds

6. Spacing and Layout

Spacing Scale (8px System)

All spacing increments are multiples of 8px for consistent rhythm and alignment.

Size	Pixels	Usage
xs	4px	Minimal padding, icon spacing
sm	8px	Padding within compact elements
md	16px	Standard padding, default spacing
lg	24px	Heading spacing, section gaps
xl	32px	Major section breaks
2xl	48px	Large whitespace, page sections
3xl	64px	Full-page spacing

Application

- Container padding: 16px–24px
- Component padding: 8px–16px
- Margin between sections: 24px–48px
- Margin between elements: 8px–16px
- Grid gap: 16px (default), 24px (larger layouts)

7. Border Radius

Radius Scale

Size	Pixels	Usage
Minimal	2px	Slight rounding, technical elements
Small	4px	Buttons, small components
Medium	8px	Cards, medium containers
Large	12px	Modals, large sections
Full	50% (circle)	Avatars, badges, circular elements

Application Rules

- Buttons: 4–8px (medium button size: 8px)
- Cards: 8px (standard), 12px (featured)
- Modals & Overlays: 12px
- Icons: 4–8px (avoid over-rounding)
- Form inputs: 4–6px
- Images: 0–8px (context dependent)

8. Shadows and Elevation

Shadow System

Level	Box-shadow	Usage
Elevation 1	0 2px 4px rgba(8, 22, 52, 0.1)	Subtle lift, hover states
Elevation 2	0 4px 8px rgba(8, 22, 52, 0.15)	Cards, button hover
Elevation 3	0 8px 16px rgba(8, 22, 52, 0.2)	Modals, overlays
Elevation 4	0 12px 24px rgba(8, 22, 52, 0.25)	Maximum emphasis (rare)
Inset	inset 0 1px 2px rgba(8, 22, 52, 0.1)	Pressed buttons, inputs

Application

- Cards: Elevation 2 (default), Elevation 3 (on hover)
- Buttons: Elevation 1 (subtle), Elevation 2 (hover)
- Modals: Elevation 4
- Pressed State: Inset shadow + slight downward shift
- Focus Ring: No shadow, use color outline instead

9. Voice and Tone

Brand Voice Characteristics

- Precise: Clear, logical, unambiguous language
- Professional: Authoritative, business-appropriate
- Approachable: Not cold; warm professionalism
- Confident: Assured without arrogance
- Technical Yet Accessible: Expert knowledge made understandable

Tone Variations

Formal (Corporate, Legal, Enterprise):

- Use: Business announcements, contracts, official communications
- Tone: Authoritative, precise, professional
- Example: "Lewers Logic LLC provides enterprise-grade solutions for mission-critical systems."

Approachable (Product, User-Facing):

- Use: Product copy, onboarding, help text
- Tone: Clear, friendly, professional
- Example: "Let's set up your account so you can start building smarter systems."

Technical (Documentation, Dev-Focused):

- Use: API docs, technical guides, code examples
- Tone: Precise, detailed, logical
- Example: "Initialize the SDK using the provided credentials and call the authenticate() method."

Writing Guidelines

Do:

- Use active voice
- Keep sentences short and clear
- Be specific and concrete
- Use technical terms accurately
- Address the reader directly ("you")
- Write for scannability (headings, bullets)
- Use consistent terminology

Don't:

- Use corporate jargon unnecessarily
- Write vague generalities
- Use passive voice excessively
- Overcomplicate simple concepts
- Use ALL CAPS (except for acronyms)
- Write in first-person plural without purpose

10. Design

System Do's and Don'ts

Do's

Color

- Do use Deep Logic Blue as the dominant color for structure
- Do use teal for interactive elements and product features
- Do use gold for business context and premium signals
- Do maintain sufficient contrast (WCAG AA minimum)
- Do test color combinations for colorblind accessibility
- Do use the accent tonal variations (Light/Dark) for interactive states

Typography

- Do use Inter for all body and UI text
- Do use JetBrains Mono for code
- Do maintain consistent type scales across layouts
- Do use bold weights (600+) for headings only
- Do pair headings and body text with adequate line-height

- Do use captions sparingly and consistently

Layout

- Do use the 8px spacing scale consistently
- Do use border-radius values from the scale
- Do apply shadows for depth and hierarchy
- Do test on responsive breakpoints (mobile, tablet, desktop)
- Do align elements to grids or spacing scale

Branding

- Do use the primary logo variation in most contexts
- Do apply the brand color palette correctly
- Do maintain clear space around the logo
- Do test brand applications in context before deployment
- Do document any extensions or custom uses

Don'ts

Color

- Don't use teal + gold in the same element
- Don't place teal text on gold backgrounds
- Don't place gold text on teal backgrounds
- Don't introduce unauthorized colors
- Don't use color as the only distinguishing factor for information
- Don't use full-saturation colors outside the approved palette

Typography

- Don't use fonts other than Inter or JetBrains Mono
- Don't use multiple typefaces in a single layout
- Don't set body text below 14px or above 18px without reason
- Don't apply multiple font-weights excessively
- Don't use text-transform: uppercase for body text
- Don't use decorative fonts or styles

Layout

- Don't ignore the 8px spacing scale
- Don't apply border-radius values outside the scale
- Don't create elements with insufficient spacing
- Don't stretch or compress the logo
- Don't place content too close to page edges
- Don't use conflicting shadow systems

Branding

- Don't modify the logo mark
- Don't change the teal L to any other color
- Don't use brand colors without contrast consideration
- Don't apply branding inconsistently across touchpoints
- Don't use the monochrome logo on the primary website
- Don't scale logos below 48px at small sizes

11.

Implementation Checklist

Before launching a new brand application, verify:

- Logo is primary variation on light backgrounds, reverse/monochrome on dark
- All body text uses Inter or JetBrains Mono
- Color palette matches hex values exactly
- All text meets WCAG AA contrast (4.5:1 minimum)
- Spacing follows 8px system
- Border radius uses approved scale
- Teal accents used for interactive elements only
- Gold accents used for business/premium context only
- No teal+gold combinations in same elements
- Teal/Gold never combined with incompatible backgrounds
- Dark backgrounds use Teal Light (#9DD2D0) and Gold Light (#E0C97A)
- Voice and tone are consistent with brand values
- All interactive states (hover, active, focus) are defined
- Responsive design tested across breakpoints

12. Asset Delivery and Extensions

Approved Formats

- Logo: SVG (vector, scalable), PNG (raster backups)
- Colors: CSS variables, HEX codes, RGB, SCSS maps
- Fonts: Google Fonts links, local file options

Version Control

- All brand assets versioned
- Changes documented and dated
- Old versions archived
- All stakeholders notified of updates

Contact and Governance

For brand questions, extensions, or guidance: Maintain this document as the single source of truth. Document exceptions and their business rationale. Review brand applications quarterly. Update this guide when standards change.
